AUTHOR INDEX

Numbers 16-20

	Number	Page
ALLEN, P. G. (*joint author*), *see* Tite, R. L.	20	10
ATKINSON, K. (*joint author*), *see* Haine, N. M.	18	1
BATEY, T. and others. Observations on the manuring of glasshouse carnations	16	1
BROWN, A. Herbicides on brassica crops	16	102
—— and WEBBER, J. Experiments on the control of whiptail in cauliflower	18	32
CALDWELL, T. H. (*joint author*), *see* Batey, T.	16	1
CANHAM, A. E. Night-break light in the production of pot plots	16	30
—— The fluorescent tube as a source of night-break light	16	53
CARTER, A. R. and DERMOTT, W. Nitrogen manuring of early flowering chrysanthemums I In unheated glass	16	12
—— (*joint author*), *see* Winter, E. J.	18	52
CARY, P. R. (*joint author*), *see* Batey, T.	16	1
CASE, M. W. (*joint author*), *see* Taylor, H.	19	54
CHEAL, W. F. and WINSOR, G. W. The response of tulips (variety Elmus) to nitrogen and potassium. Part I. Sand culture	18	88
—— (*joint author*), *see* Winsor, G. W.	19	61
CHUMBLEY, C. G. Experiments on the manuring of spring cabbage in the West Midlands	19	39
COCK, L. J. and DIXON, G. M. Willow-carrot aphid and carrot motley dwarf in Yorkshire 1962–65	20	80
COCKSHULL, K. E. (*joint author*), *see* Hughes, A. P.	16	44
—— *see* Hughes, A. P.	20	1
CRAZE, S. P. (*joint author*), *see* Winter, E. J.	18	52
CROFTS, J. A. (*joint author*), *see* Marston, Margaret E.	20	14
DERMOTT, W. (*joint author*), *see* Carter, A. R.	16	12
DIXON, G. M. (*joint author*), *see* Cock, L. J.	20	80
EBBEN, M. H. (*joint author*), *see* Haine, N. M.	18	1
FIDLER, J. H. (*joint author*), *see* Haine, N. M.	18	1
FLEGG, P. B. and RANDLE, PHYLLIS E. Re-use of mushroom bed compost	17	38
FLETCHER, J. T. (*joint author*), *see* Ganney, G. W.	20	44
FRADGLEY, JOYCE R. A. (*joint author*), *see* Salter, P. J.	18	40
GANNEY, G. W. and FLETCHER, J. T. A comparison of the fruit characters of six strains of the cucumber cultivar Butcher's Disease Resister	20	44
GARNER, H. V. Field experiments on carrots at Rothamsted, Woburn and Tunstall (Suffolk)	18	69
GARTHWAITE, JEAN M. Brussels sprouts: production of early crops	18	60
HAINE, N. M. and others. Techniques for minimizing yield losses, attributable to potato root eelworm and pathogenic fungi, when growing tomatoes in unheated glasshouses	18	1
—— and WEBBER, J. Experiments on nitrogenous top dressing of spring cabbage at Stockbridge House	19	32
HILLS, MARY G. and LITTLE, R. C. Use of fertilizers on horticultural crops	19	16
HOW, J. (*joint author*), *see* Whitwell, J. D.	16	69

	Number	Page
HUGHES, A. P. and COCKSHULL, K. E. Effects of night-break lighting on bedding plants	16	44
—— Commercial bloom production in the glasshouse rose Pink Sensation	20	1
HUGHES, HILARY M. Planting date and runner source for early strawberries under glass cloches	16	119
—— Comparison of covering times for cloched strawberries	16	129
—— Runner storage and plant size in relation to yield of strawberries	16	135
—— Herbicides for newly planted strawberries	18	77
—— Experiments on the non-cultivation of spaced strawberries	18	83
—— Strawberry varieties for glass cloche production	19	71
—— Comparison of strawberry varieties and planting times under polythene tunnels	19	79
—— Strawberry varieties compared for annual crops	20	55
HUME, W. G. Methods of applying farmyard manure	16	112
JARVIS, R. H. and others. Nine strawberry varieties in matted and spaced rows	17	70
JEFF, ELIZABETH A. The effects of soil treatments on anemone downy mildew infection	18	101
JENKINSON, J. G. and WILLIAMS, AUDREY M. Stem rot and scorch in winter cauliflowers	17	57
JOHNSON, E. W. (*joint author*), *see* Jubb, S.	16	19
JUBB, S. and JOHNSON, E. W. Nitrogen manuring of early flowering chrysanthemums. II. An outdoor crop covered at flowering	16	19
KING, J. M. Manurial experiments in dwarf French beans	19	47
LAFLIN, T. (*joint author*), *see* Winter, E. J.	18	52
LAST, F. T. (*joint author*), *see* Haine, N. M.	18	1
LITTLE, R. C. (*joint author*), *see* Hills, Mary G.	19	16
LOCKIE, G. D. (*joint author*), *see* Menhenett, R.	17	9
LOWCOCK, A. M. (*joint author*), *see* Menhenett, R.	17	9
MARSTON, MARGARET E. and others. Propagation of roses by cuttings using small amounts of plant material	20	14
MAXIM, B. N. (*joint author*), *see* Marston, Margaret E.	20	14
MCKAY, W. Some effects of deciduous shelter belts at Stockbridge House	19	1
MENHENETT, R. and others. Effects of plant density and flower stem cutting length on the perpetual flowering carnation	17	9
MOSS, N. Mulching freshly-planted cider apple trees	19	90
POTTER, J. M. S. (*joint author*), *see* Jarvis, R. H.	17	70
RANDLE, PHYLLIS E. (*joint author*), *see* Flegg, P. B.	17	38
REES, A. R. Effect of shade on the flowering of seed-grown freesias	17	15
—— and TURQUAND, ELIZABETH D. Effects of lifting date and warm storage on tulip flowering	17	78
—— Effects of temperature and duration of cold treatment on the flowering of forced tulips	20	49
ROGERS, W. S. (*joint author*), *see* Jarvis, R. H.	17	70
ROTHWELL, J. B. Autumn lettuce: investigations on the effect of environment on yield and quality	20	35
SALISBURY, RACHEL A. (*joint author*). *see* Marston, Margaret E.	20	14
SALTER, P. J. and FRADGLEY, JOYCE, R. A. The influence of sowing date on the performance of certain groups of summer and autumn cauliflower	18	40
SMITH, D. R. Night temperature and the growth of perpetual flowering carnations	17	1
—— Controlled flowering of *Primula malacoides*	20	22
SMITH, F. G. (*joint author*), *see* Haine, N. M.	18	1

	Number	Page
SMITH, MURIEL W. G. Historic apples in the Burlington House exhibit	17	67
SMITH, W. HUGH and WALLIS, L. W. Use of low temperature to intensify colour of cut blooms of narcissus Soleil d'Or	17	21
TATHAM, P. B. Observations on bolting in several varieties of early red beet for bunching, 1963–65	17	51
TAYLOR, H. and CASE, M. W. Leek variety trials 1961–64	19	54
TITE, R. L. and ALLEN, P. G. Propagation of roses by soft-wood cuttings	20	10
TURQUAND, ELIZABETH D. (*joint author*), *see* Rees, A. R.	17	78
——— *see* Rees, A. R.	20	49
WALLIS, L. W. Warm storage of narcissus bulbs before hot water treatment	17	27
—— (*joint author*), *see* Smith, W. Hugh	17	21
WARDLOW, L. R. (*joint author*), *see* Winfield, A. L.	16	88
WEBBER, J. and WILLIAMS, AUDREY M. Experiments on nitrogenous top dressing of spring cabbage at Rosewarne	19	23
—— (*joint author*), *see* Brown, A.	18	32
—— (*joint author*), *see* Haine, N. M.	19	32
WHITEHEAD, T. (*joint author*), *see* Batey, T.	16	1
WHITWELL, J. D. Herbicides for spring sown bulb onions grown on silt lands	20	62
—— and HOW, J. Early summer cauliflower variety trials 1961–65	16	69
WILLIAMS, AUDREY M. (*joint author*), *see* Jenkinson, J. G.	17	57
——— *see* Webber, J.	19	23
WINFIELD, A. L. and WARDLOW, L. R. Cabbage root fly on summer cauliflowers on a silt soil	16	88
WINSOR, G. W. and CHEAL, W. F. Response of tulips (variety Elmus) to nitrogen and potassium. Part II Field grown crops	19	61
—— (*joint author*), *see* Cheal, W. F.	18	88
WINTER, E. J. and others. Irrigation of summer cauliflower – experiments at Efford, Luddington and Wellesbourne	18	52

SUBJECT INDEX

Numbers 16-20

	Number	Page
Ageratum, response to night-break lighting	16	45
Alyssum, response to night-break lighting	16	48
Analytical methods for glasshouse soils	16	11
Anemone downy mildew, control	18	101–109
Aphids, occurrence on carrots and control	20	81–90
Apple, cider, crab seedling rootstocks	19	90
—— —— mulching newly planted trees	19	90–93
—— description of historic varieties	17	67–69
—— fertilizer practice	19	21
Aster, China, response to night-break lighting	16	44
Beans, fertilizer practice	19	18
—— dwarf French, manurial experiments	19	47–53
Bedding plants, effect of night-break lighting	16	44–52
Beetroot, bolting in early varieties	17	51–55
—— farmyard manure, effect on yield	16	115
Botrytis allii, cause of neck-rot in onions	20	72
Botrytis, on freesias, control of	17	16
—— on *Primula malacoides*	20	24
—— on strawberries	16	140
————	17	76
—— —— control	20	56
—— —— varietal susceptibility	16	123
—— on tulip bulbs	18	90
Brassicas, assessment of cabbage root fly damage	16	90
—— herbicides for	16	102–111
Broccoli, fertilizer practice	19	16
Brown root rot of tomatoes	18	1–31
Brussels sprouts, early crop production	18	60–68
—— single pick harvests	18	60
—— fertilizer practice	19	16
—— herbicides	16	106–110
Bulb crops, fertilizer practice	19	18
Cabbage, fertilizer practice	19	16
—— spring greens, bolting	19	29
—— —— effect of planting date on yield	19	26
—— —— response to nitrogen	19	23–31
—— spring hearted, response to nitrogen	19	32–38
————	19	39–46
—— —— response to potassium	19	42
—— summer, herbicides	16	103–110
Cabbage root fly, assessment of egg laying	16	88
—— assessment of root damage	16	90
—— control	16	88–100
—— on summer cauliflower	16	88
Callistephus chinensis see Aster, China		
Calomel as control for Anemone downy mildew	18	101
Carbon dioxide, use on autumn lettuce	20	35
—— production from dry ice	20	38
—— production from propane	20	41
—— supply in glasshouses	20	1
Carbon disulphide, partial soil sterilant	18	4
Carnation, calculation of water need	17	2
—— flower grades	17	3
—— flower production	16	3
—— liquid feeding	17	2
—— manuring	16	1–11

	Number	Page
—— night temperature	17	1
—— planting density	17	1
—— production costs	17	13
Carnation wilt	17	5
Carrots, aphid infestation	20	81
—— —— control	20	81
—— effect of pH on yield	18	69
—— effect of soil conditioners	18	74
—— fertilizer practice	19	18
—— liming experiments	18	69
—— manuring	18	69–76
—— response to farmyard manure	18	70
—— response to leys in rotation	18	73
—— response to nitrogen	18	70
—— response to potash	18	70
Carrot virus	20	80–89
Cauliflower, blindness	16	84
——	18	32
—— fertilizer practice	19	16
—— propagation methods	16	71
—— response to farmyard manure	16	115
—— response to temperature	18	49
—— size grades	16	74–92
—— sowing dates, determination by day degrees	18	41
—— variety classification	16	74
—— whiptail	16	71
—— —— control	18	32–39
—— autumn, herbicides	16	106
—— summer, cabbage root fly	16	88, 101
—— —— curd browning	18	58
—— —— irrigation	18	52–59
—— —— variety trials	16	69–85
—— —— yields	16	97
—— summer and autumn, continuity of production	18	40–51
—— winter, response to nitrogen	17	59
—— —— scorch	17	57–66
—— —— stem rot	17	57–66
Celery, fertilizer practice	19	18
Chemical soil sterilants	18	1–31
—— cost of application	18	26
Cherries, fertilizer practice	19	21
Chloropicrin, application to glasshouse soils	18	4
—— as control for Anemone downy mildew	18	101
Chrysanthemums, early flowering in unheated glass	16	12–18
—— —— outdoor crop covered at flowering	16	19–29
—— —— response to nitrogen	16	12–29
—— leaf analysis	16	15
Chrysanthemum morifolium, control of flowering by lighting	16	53–68
Cider apples, *see* Apple, cider		
Cladosporium fulvum on tomatoes, control	18	3
Cloche culture of strawberries	16	119–128
——	16	129–133
Colletotrichum coccodes	18	1
Copper, soil application to control Anemone downy mildew	18	101
Cucumber, fruit characters	20	44–48
Cultivation methods, effect on vegetable yields	16	117
Day degree intervals to determine cauliflower sowing dates	18	42
Dazomet, sterilant for glasshouse soils	18	1
D-D, applied to soil for control of Anemone downy mildew	18	101
—— sterilant for glasshouse soils	18	4
Didymella lycopersici on tomatoes, control	18	3
Domestic wastes as a source of organic matter	18	72
Eelworm on Narcissus, control	17	27
Efford EHS, soil analysis	16	102, 113
Erioischia brassicae, *see* Cabbage root fly		

	Number	Page
Farmyard manure effect on yield of carrots	18	70
—— effect on yield of lettuce	16	114
—— methods of application	16	112–118
—— as mulching material	19	90
Fertilizer use on horticultural crops, a survey	19	16–22
Fluorescent tubes for supplementary lighting	16	30
—— costs	16	65–8
—— for lighting chrysanthemums	16	53–68
—— spectral distribution	16	54
Formalin. soil applied, to control Anemone downy mildew	18	101
Freesia, control of *Botrytis*	17	16
—— propagation	17	15
—— response to shading treatments	17	15–20
—— response to temperature	17	17
Fuchsia, response to lighting treatments	16	30–39
Glasshouse soils, analysis of	16	2, 11, 16
—— conductivity factor	16	8
—— determination of PC	16	17
Herbicides on brassicas	16	102–110
—— on bulb onions	20	62–79
—— on strawberries	18	77–82
Heterodera rostochiensis see Potato cyst eelworm		
Hops, fertilizer use	19	20
Hot water treatment of Narcissus bulbs	17	27–37
Illumination, measurement of	16	39
Incandescent lamps for supplementary lighting	16	30
Irrigation, determination of need	18	52
—— experiments on cauliflower	18	52–59
Kipp solarimeter	17	2
Krilium soil conditioner	13	24
Leeks, quality grading	19	54
—— variety trials	19	54–60
Lettuce, effect of chemical soil sterilants on yield	18	29
—— response to farmyard manure	16	114
—— autumn, response to carbon dioxide enrichment	20	35–43
—— —— response to temperature	20	35–43
—— —— varieties	20	35
Leys, effect on yield of carrots	18	73
Lighting, night break, effect on bedding plants	16	44–52
—— —— effect on chrysanthemum	16	53–68
—— response of China aster	16	44
—— response of Fuchsia	16	30–39
—— response of Pelargonium	16	37
Lime, effect on yield of carrots	18	69
Luddington EHS, description of soils	16	113
Magnesium, availability in glasshouse soil	16	7
—— response of carnations	16	4
—— response of tulips	19	66
Manurial requirements of horticultural crops	19	16
Manuring of dwarf French beans	19	47–53
Manuring of glasshouse carnations	16	1–11
Marigold, response to night-break lighting	16	48
Mercury discharge lamps for supplementary lighting	16	53
Metham sodium, sterilant for glasshouse soils	18	1
Methyl isothiocyanate	18	17
Molybdenum deficiency in cauliflower	18	32–39
Mulching materials	19	90

	Number	Page
Mushroom beds, casing material	17	38
Mushroom compost, effect of composition on yield	17	41
—— re-use of	17	38–49
Narcissus, eelworm, control methods	17	27
—— internal stage of development	17	28
—— hot water treatment, temperature	17	32
—— warm storage of bulbs, before hot water treatment	17	27–37
—— —— effect on date of flowering	17	30
—— —— effect on flower quality	17	34
—— *poeticus*, Double White, warm storage of bulbs	17	35
—— Soleil d'Or, cool storage of cut blooms	17	21–26
—— —— —— effect on vase life	17	25
—— —— warm storage of bulbs	17	35
National Vegetable Research Station, irrigation indicator	18	59
Nitrogen, availability in glasshouse soils	16	7
—— content in cabbage leaves	19	35
—— content in chrysanthemum leaves	16	27–29
—— content in tulip bulbs and leaves	18	94
—— requirement of carnations	16	1
—— requirement of chrysanthemums	16	12–29
—— requirement of carrots	18	70
—— requirement of tulips	18	88
—— response of dwarf French beans	19	48
Nitrogenous fertilizers, effect on soil N levels	16	19
————————	19	35
————————	19	40, 45
—— as top dressing for spring cabbage, greens	19	23
—— —— hearted	19	32
————	19	39
Onions, bulb, fertilizer practice	19	18
—— —— herbicides	20	62–79
—— —— neck rot caused by *Botrytis allii*	20	72
Organic matter, domestic wastes as a source	18	72
Organo-phosphorus insecticides to control cabbage root fly	16	88–100
Pansy, response to night-break lighting	16	47
Pathogenic fungi on cold-house tomatoes	18	1–31
Pears, fertilizer practice	19	21
Peas, fertilizer practice	19	18
Pelargonium, response to lighting treatments	16	37–42
Peronospora sp., see Anemone downy mildew		
Petunia, response to night-break lighting	16	48
Phlox drummondii, response to night-break lighting	16	45
Phosphorus, availability in glasshouse soils	16	6
—— content of tulip bulbs and leaves	18	94
—— requirement of carnations	16	1
—— response of dwarf French beans	19	48
—— response of tulips	19	66
Phytophthora Fragariae, *see* Strawberry red core		
Plums, fertilizer practice	19	21
Polythene tunnels, *see* Tunnels		
Potassium, availability in glasshouse soils	16	6
—— requirement of carnations	16	1
—— requirement of carrots	18	70
—— requirement of tulips	18	88
—— response of dwarf French beans	19	48
—— response of spring cabbage	19	42
Potato cyst eelworm, cause of yield loss in tomatoes	18	1–31
—— determination of populations	18	11
—— effect of soil sterilants on populations	18	11
Potato root eelworm, *see* Potato cyst eelworm		
Pot plants, control of flowering	16	30
—— response to night-break lighting	16	30–43
Primula malacoides, control of flowering	20	22–34

	Number	Page
—— propagation	20	23
Propagation of cauliflower	16	71
—— of roses	20	10–13
————	20	14–21
Pyrenochaeta	18	1
Review of Persistant Organochlorine Pesticides	16	88
Rootstocks for roses	20	10
—— for tomatoes	18	1
Rosa canina, rose rootstock	20	10
Rose, glasshouse, effect of CO_2 on cropping	20	1
—— —— effect of light incidence on cropping	20	6
—— —— effect of temperature on cropping	20	1
—— —— occurrence of blind wood	20	6
—— —— rest period	20	6
—— propagation by cuttings	20	10, 14
—— ——effect of temperature on rooting	20	10, 14
—— ——varietal difference in rooting	20	11
Rose bushes, container growing	20	10
Rose rootstock, *Rosa canina*	20	10
Salvia, response to night-break lighting	16	47
Sawdust as mulching material	19	90
Sewage sludge, effect on yield of carrots	18	73
Shelter belts, effect on wind speed and temperature	19	3–12
—— measurement of permeability	19	2
—— suitable trees and shrubs	19	1
Soil conditioners for heavy clay soils	18	74
Soil index as a guide to manurial requirements	19	16
Soil sterilization, chemical	18	1
—— steam	18	1
Soils, glasshouse, analytical methods	16	11
Spectral distribution, fluorescent tubes	16	54
—— tungsten lamps	16	54
Stockbridge House EHS, description of soils	18	32
Straw as mulching material	19	90
Strawberries, autumn cropping	16	140
—— —— Redgauntlet	16	126
—— *Botrytis*	17	76
————	16	140
—— —— control	20	56
—— cash returns	19	76
————	19	84
—— causes of waste fruit	19	86
—— cloched, covering dates	16	129–133
————	19	71
—— —— flowering dates	16	131
—— —— planting dates	16	119–128
————	19	71
—— —— runner source	16	119–128
—— —— time of fruit ripening	19	76
—— —— varieties	19	71–78
—— grown in matted and spaced rows	17	70–76
—— herbicides	18	77–82
————	18	83
————	20	56
—— in tunnels, harvesting dates	19	80
—— —— management	19	80
—— —— planting times	19	79–87
—— —— temperature records	19	86
—— —— varieties	19	79–87
—— mildew control	20	56
—— mishapen fruit, causes of	19	73
————	19	85
————	20	58
—— non-cultivation methods	18	83–87
—— red core	16	120

	Number	Page
———	16	127
—— runners, control of	18	79, 83
—— —— raising methods	20	55
—— ——storage of	16	135–141
—— —— sources	16	119–128
Strawberries, varieties, for annual cropping	20	55–60
—— —— response to growing method	17	71
—— *Zythia Fragariae*	16	140
Supplementary lighting, for chrysanthemums	16	53–68
—— for pot plants	16	30–43
—— mercury discharge lamps	16	53
—— sources	16	30
—— tungsten lamps	16	47
Tomatoes, brown root rot fungus	18	1–31
—— —— effect on yield	18	22
—— control of *Cladosporium fulvum*	18	3
—— control of *Didymella lycopersici*	18	3
—— control of soil borne pathogens in unheated glass	18	1–31
—— grafted compared with ungrafted plants	18	16
—— rootstocks for	18	1
Tulip, bulb storage treatments	17	78–81
—— —— effect on flowering date	17	79
—— —— effect on flower quality	17	80
———	20	51
—— —— effect on forcing	17	78–81
———	20	49–53
—— *Botrytis* damage to bulbs	18	90
—— chalkiness in bulbs	18	96
—— effect of lighting date and storage treatment on flowering	17	78–81
—— forcing, determination of readiness to house	20	50
—— —— five degree method	20	52
—— mineral composition of leaves and bulbs	18	94
———	19	67
—— nutrition in sand culture	18	88–99
—— occurrence of topple	18	89
—— response to nitrogen	18	88
———	19	61
—— response to potassium	18	88
———	19	61
Tungsten lamps, costs	16	65–68
—— for supplementary lighting	16	47
—— —— chrysanthemums	16	53–68
—— spectral distribution	16	54
Tunnels, covering materials	19	79
—— polythene, construction	19	89
—— —— for strawberry culture	19	79–87
—— temperatures within	19	86
Verticillium cinerescens, see Carnation wilt		
Virus infection in carrots	20	81–89
Whiptail in cauliflower	16	71
———	18	32–39
Zythia fragariae on strawberries	16	140
